

- 1** Turn off power at the breaker.
- 2** Remove backplate from canopy & mount to the junction box.
- 3** Wire transformer within the canopy to the junction box.
- 4** Mount canopy that is suspending the fixture to the mounted backplate on the junction box.
- 5** Adjust individual ring heights via clutch grips on the canopy face until the desired orientation is achieved.
- 6** Apply power!

ELECTRICAL INSTALLATION

- A** Wire Black and White transformer wires to Junction Box wires.
- B** Wire Red transformer output wires to fixture input wires.
