

Stria Chandelier

Multiple striations of light are created by a central stem and 3 light stems with an E26 socket on each end of each stem, create an interesting and unique lighting creation. Each is adjustable where each stem meets the central stem. Field adjusting of heights and angulation and rotation of each light source is easily accomplished. Beautiful brushed brass and black finishes.

Arms can be tilted or flattened through simple field adjustment. Increasing angulation makes the fixture width less when all 3 stems are angled. The widest width achieved with stems and bulbs is 51". The widest width without the bulbs is 32".

Several vintage LED Bulbs from Penny Lane Collection can be specified. Bulbs are offered in amber, clear and smoke glass. Smoke glass is only offered for S165 Bulb.

Ships with stems: (3 pcs.) 12", (1 pc.) 6", (1 pc.) 3". For custom stem lengths, consult customer service.

MB6 Lamp not included.

Approximate fixture weight: 10lbs
